

# Blue Moons

The blue quarks created by the explosion when the Xyclotron was turned on have affected these three blue worlds.

First solve all three puzzles.

Then use the holes in the puzzle on this page as a mask to count letters to get your final answer.

## THE DARK WORLD:

### Svartalfheim

The blue-skinned Frost Giants of Jotunheim are prisoners of the Dark Elves. Fortunately, their savior is here! Help them find the holes in this prison.

Each number indicates how many of the 9 cells it touches should be filled in. The puzzle is similar to Minesweeper.
